Android: Layouts

Exercises

1. Design a simple interface for writing an email message. Include a "To" field, a "Subject" field, a "cc/bcc" field, an area to write the message, a "Send" button, a "Save as draft" button and a "cancel" button.

2. Build an app that displays a list that shows the first name, last name and telephone number of each contact in your contacts database. (HINT: Take a look at http://developer.android.com/guide/topics/ui/layout/listview.html).

3. Build an app that shows a thumbnail image of all the photos stored in the gallery on the device. (HINT: This might help: http://developer.android.com/guide/topics/media/camera.html#saving-media)
